Product Overview

ZDH1421 is a high-performance transmit/receive (TX/RX) front-end module that integrates a power amplifier (PA) and a low-loss single-pole double-throw (SPDT) switch. All functions are controllable via a single two-wire interface. The module can operate in deep sleep mode with a current draw of less than 1μA. Three independent VCC pins provide maximum RF isolation.

ZDH1421 is packed in a green, lead-free standard 4x4-16 package, offering excellent reliability, cost-effectiveness, and a high performance-to-price ratio.

Typical Application Scenarios

- Automated meter reading
- Advanced metering infrastructure
- ISM systems
